

Talent 101 Recognized for Excellence by Texas Instruments

The annual award honors companies whose dedication and commitment in supplying products and services meet TI's high standards for excellence. Recipients are an elite group of suppliers chosen for their exemplary performance in the areas of cost, environmental & social responsibility, technology, responsiveness, assurance of supply, and quality.

Out of 10,000 suppliers globally, only 16 companies received the award and Talent 101 is the only recipient in the staffing services category.

Talent 101 was recognized in part for their exemplary service in supporting TI's engineering and IT departments by providing value above placing skilled technical talent at TI.

"Talent 101 has demonstrated the ability to not only locate qualified candidates, but goes a step further by understanding TI's business needs and then provides innovative approaches to meeting those needs", said Simpson.

"Along with our more than 100,000 customers, we expect world-class performance and execution from our suppliers. These winners have demonstrated outstanding commitment and ability to support and provide value to TI."

— Rob Simpson, Vice President of
TI Worldwide Procurement and
Logistics

About Talent 101

Talent 101 has developed a reputation among the semiconductor industry as an invaluable and accommodating staffing solution partner. We manage a ready “CIRCUIT” of semiconductor professionals, resources and certified sub-contractors to provide a reliable global workforce when you need it the most.

Talent 101's vast experience as a global services provider for workforce solutions means you get a complete solution and end-to-end support. We work closely with customer managers to understand their exact needs and deliver an appropriate solution, whether with additional resources or SOW milestone delivery to manage risks and ensure successful outcomes.

Talent 101 can also oversee your day-to-day vendor and workforce management, as well as managing recruiting responsibilities, as defined by your specific cost and quality requirements.
